Dear Colleague,

My name is Dr. Dale Miller, DVM. I am the proprietor of two Veterinary clinics, and I wanted to share with you something that has made a huge difference at my clinics. My practice manager mentioned that we spend a lot of time and money on the constant cleaning of the lobby, waiting and exam rooms. So I decided to look for a solution.

A colleague told me about a product her company (Pinpoint Resolutions, LLC), was researching to meet the need of eliminating bacteria in the Veterinary marketplace. This intrigued me so I wanted to learn more. After several discussions, I was asked if I would complete a clinical study on the product's use and effectiveness. I organized and utilized an independent outside laboratory to conduct and validate the test results and findings.

The results were **remarkable**¹. The science is Nanotechnology, manufactured by Zoono®. This product is so great because after you clean the area with your current disinfectant and you apply a layer of Zoono® protectant (**Microbe Shield**), you won't have to disinfect again for up to **thirty (30) days!!** Zoono® is colorless, odorless, non-toxic, environmentally safe, water-based and is easy to use. Although completely gentle for humans and animals, it is deadly for a wide range of bacteria and mold.

Unlike traditional sanitizer technologies, Zoono® delivers a "physical kill" to any pathogen subject to lyses (the bacteria strike millions of 'pins' that attract and kill the bacteria). Organisms cannot adapt, so there is NO Mutation and consequently NO Superbugs. Zoono® provides the anti-bacterial, anti-viral, anti-fungal and anti-algal protection and is EPA registered, FDA compliant and certified.

Bring your clinic or institution to the cutting edge with Nanotechnology, the tested true superior alternative to the most effective and safest method to combat germs.

Sincerely,

Dale Miller, DVM

Try it and see for yourself. Review the enclosed flyer to get the details in what to order and how to save.
